

KEY TO ABUNDANCE CODES

C = common; seen nearly daily in appropriate season(s) in low to medium numbers
 U = uncommon; annual in appropriate season(s) in medium numbers (11-50/year)
 R = rare; probably annual in appropriate season(s), but in low numbers (1-10/year)
 X = accidental; <4 individuals recorded
 NB= non-breeding;
 I = introduced
 (s) = spring; (f) =fall
 (▲) = increasing distribution; (▼) = decreasing distribution
 Reports of species on the Colorado Bird Records Committee (CBRC) Review List, www.coloradobirdrecords.org, should be submitted electronically for review and future inclusion on this list.

CHICO BASIN RANCH

CHECKLIST OF BIRDS
EL PASO AND PUEBLO COUNTIES
COLORADO ~ FEBRUARY 2018

Since the first **CHICO BASIN RANCH** bird checklist was created in December 1999, many new bird sightings have been documented and added to the official list. In 2017, three new bird species were found on Chico Basin Ranch including Tropical Kingbird, Pacific Wren, and Common Redpoll.

For birders who document their sighting on eBird, traveling south from the ranch entrance in El Paso County, Chico continues into Pueblo County after crossing the 2nd cattle guard where a dirt road follows the fence line east to a T intersection. Chico's headquarters sign-in and the large reservoirs are all in Pueblo County.

A big thank you goes out to Chico's partner, Bird Conservancy of the Rockies, who provides bird banders during both the spring and fall season when the majority of birds are recorded in Chico's many migrant traps. Tony Leukering created the first Chico bird checklist which is now updated yearly. Since its inception, Bryan Patrick continues to donate many hours of his time on the checklist layout and Bill Maynard updates the yearly changes in species abundance and taxonomic changes. This year's checklist cover photo is of a Tropical Kingbird, a species that was new in 2017 not only on Chico Basin Ranch, but also in Colorado.

Tropical Kingbird
